UTILITY PIPELINE

4100 HOLIDAY STREET, N.W., SUITE 201 – CANTON, OHIO 44718-2589 – 330-498-9130 – 888-863-0032 – 330-498-9137 FAX

Dear Customer,

This packet contains the required forms and information to assist you in obtaining natural gas service.

The Natural Gas Cooperative/Utility is responsible for installing all natural gas main line. You are required to have a Utility Pipeline, Ltd. certified contractor/excavator install the customer service line (measured from property line to house) and main line tap. Please call 330-498-9130 ext. 317 for further instructions.

IMPORTANT DOCUMENTS

Natural Gas Application:

Please complete the enclosed application to start service line installation process.

Customer Load Profile:

Please complete the enclosed customer load profile questionnaire so we may better serve your natural gas requirements. Submit this form with your application.

House Line Pressure Test Form:

Please notify your plumbing contractor who is installing the internal house lines and natural gas appliance to complete the “House Line Pressure Test Form” after testing the internal gas piping. Our meter installer will pick up this form the day he/she is scheduled to set the meter, so this form needs to be left at the home in a visible place (such as taped to the furnace or in a bag taped outside to the meter prefab).

Meter Installation Specifications:

Please note all the specifications on the image enclosed. These regulations are enforced by Utility Pipeline, Ltd.

Customer Service Line –Installation Specifications:

The customer shall own and be fully responsible for the installation, ownership, maintenance, and repairs of the gas service line from the property line to the home (“customer service line”), at the customer’s expense. This line shall be subject to inspection and testing as provided herein, but the Company assumes no responsibility. (Please refer to the enclosed diagram.)

If you have any questions or need additional applications (packets), please contact our customer service center at 1-888-863-0032.

Sincerely,

UTILITY PIPELINE, LTD.

Meter Installation Specifications

Meter should be straight as shown

Shut-Off Valves:
MUST BE A SHUT-OFF VALVE ON THE METER PRE FAB

MINIMUM DISTANCE from meter to a window, vent, electrical unit or air conditioner is:
36 INCHES

Pipe through the wall must be installed through plastic or be properly wrapped according to the local building code.

Bottom of meter must be at least 12 inches above ground level.

Must be a Perfection, Rigid or Flex Riser

NOTE: Installation of Riser is very important. **DO NOT** install with excess weight pulling down on riser or buried service line.

Tracer Wire must be easily found, Wrap it around the Bracket.

INSTRUCTIONS FOR ESTABLISHING NATURAL GAS SERVICE:

1. Fill out and send in your Application Card and Customer Load Profile. You will be invoiced for the membership fee and Tap Fee, if applicable.
2. Please call 330-498-9130 ext. 317 for further instructions. See service installation video at:

WWW.UTILITYPIPELINE.LTD.COM

3. Contact a certified HVAC Contractor to have all your internal house plumbing installed with a shut off valve to each natural gas appliance you would like to burn gas. **At least one appliance must be ready to burn gas prior to scheduling your meter set. The contractor must Pressure Test the internal plumbing and leave the "House Line Pressure Test Form" on site or fax into customer service office at 330-498-9137 before a meter can be requested.**
4. **Call UPL's Customer Service at 1-888-863-0032 after your customer service line has been installed and tap into the main line has been completed to schedule the meter installation.** *Note: someone over the age of 18 must be present at the time of meter installation.
